

**2013 SOUTHEAST DISTRICT FALL FIRE SCHOOL  
HURLEY FIRE DEPARTMENT  
SEPTEMBER 8, 2013**

Mission Statement: To promote safety and integrate the efforts of Local, State, and Federal agencies in structural and wildland firefighting practices.

**Class 1 – Fire Apparatus Pumping Operations**

The content of the class will be to introduce the student to the basics of fire ground hydraulics, and pump operations for single family dwellings to the large scale operations. Material for the class will be centered on the IFSTA Textbook for Pumping Apparatus. Topics to be covered are basic pump operation, in draft scenarios, hydrant scenarios, relay pumping, and supply with LDH. Instructor is T.J. Sanborn – 6 hrs – no class limit

**Class 2 – Large Area Search: Managing the Lost Person Incident (MLPI)**

This class is designed to teach the essential knowledge and skills necessary to perform as the initial Incident Commander on a lost person incident with the primary focus on the search element of SAR. The class will prepare the students for the management responsibilities and leadership skills required during a SAR mission, and explains the tasks and procedures needed to effectively manage operations from the initial response through the expansion phases of the search to the final demobilization of all resources.

Instructors are John Seton from the Sioux Falls Fire Rescue and SD Civil Air Patrol, and Captain Joseph Oye from the Sioux Falls Civil Air Patrol – 6 hrs – no class limit – PPE should include but not limited to hard soled boots, pants, and eye protection. Optional equipment should include GPS units and cell phones.

**Class 3 – E.V.O.C. – Emergency Vehicle Operations Course**

The morning classroom session will cover applicable laws and safety issues while operating an emergency response vehicle. The afternoon session will involve operating a vehicle through an obstacle course.

Instructor is Gary Lembcke – 6 hrs – no class limit

**Class 4 – Spray Plane Safety**

This class is designed to give basic knowledge of spray planes. It will teach the responder on how to approach a plane, extinguish a fire, and extricate a victim that may be involved in a spray plane accident. It will also show some basic safety, such as battery location and disconnect, and fuel and chemical locations. There will also be some basic information on spray helicopters as well.

Instructor is Richard Hall – 3 hrs (morning session) – no class limit

**Class 5 – Helicopter Safety**

This class is designed to inform the emergency responder of how, when, and where to approach a helicopter when assisting with loading a patient. It will also provide information of communication requirements and policies between ground and flight crews.

Instructor is Eric Van Deusen – 3hrs (afternoon session) – no class limit

**Class 6 – CPR Certification**

This class will certify or re-certify students in the life saving skills of CPR. If a CPR card is needed, the cost is \$5.00.

Instructor is Josh Viet – 3 hrs (morning session) – class limit of 30 students

**Class 7 – Spinal Immobilization**

This class is designed for the EMS provider and firefighters who assists at trauma incidents. We will review situations in which spinal immobilization is indicated, discuss the different techniques of immobilization including supine, standing, and seated immobilizations. Assessment techniques will also be covered. The majority of the class will include practical hands on applications of spinal immobilization techniques.

Instructor is Chad Skiles – 3 hrs (afternoon session) – no class limit – EMS hours available.
